

Engineering and Technology

Essential Life Skills

Teacher's Guide

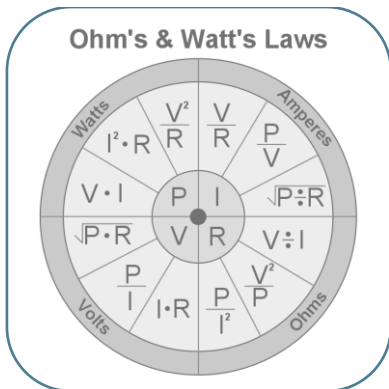

Table of Contents

Introduction: Electricity	7
Potential Accommodations	8
Chapter 1: Electricity – Voltage Divider Design	9
Objectives	9
Prior Knowledge	9
Instruction	9
Overview	10
Necessary Materials	10
Scenario I	10
Question 1	11
Question 2	11
Procedure	11
Question 3	12
Question 4	12
Procedure	12
Question 5: Measuring the voltage of the circuit you assembled	13
Procedure	13
Scenario II	13
Chapter 2: Heat Cooling Energy Transfer	16
Objectives	16
Prior Knowledge	16
Necessary Materials	16
Instruction	17
Assessment Possibilities	17

The Annotated Goldilocks and The Three Bears.....	18
Chapter 3: Home Energy (Math)	22
Prior knowledge and skills.....	22
Assessment Tasks	22
Scoring Criteria.....	22
Possible Accommodations	23
MATH CONCEPTS	23
1. Statistics.....	24
2. Decimal Arithmetic	24
3. Percent	27
4. Time.....	27
Chapter 4: Simple and Compound Machines	29
Objectives	29
Definitions.....	30
Following the Tour de France: On Your Mark... ..	32
The Price of Performance	33
Count Your Teeth	34
Great Exploration.....	35
What You Need.....	35
Activity	35
Additional Bicycle Activities.....	36
Chapter 5: Simple Machines MATH	37
Assessment Tasks	37
Recommended Accommodations	37
MATH CONCEPTS	38
1. Work	38
2. Law of Machines	38
3. Machine Efficiency.....	39
4. Types of Simple Machines	39

Chapter 6: Mass v. Weight.....	42
1. Units of Mass.....	42
2. Units of Weight	43
Appendix A: Pre-Assessment Questions	45
Appendix B: Post-Assessment Questions	46
Appendix C: Assessment Answers	47
Pre-Assessment Answers (Praxis Practice Test).....	47
Post-Assessment Answers	47
